October 2010 – March

2011

WORD FROM THE FOUNDERS

2010 has been an eventful year with many women achieving pregnancies after a long walk to parenthood whilst others continue to trust for their miracle. Still others have decided not to walk the route of fertility treatment and enjoy a full life with their spouse. Whatever your decision has been, may you find peace on that particular road and continue to live a rich and rewarding life. May 2011 be a blessed year for you and your family as you live your life to the fullest. With or without children, you have plenty to be blessed about in life !

an important lesson ON FALLING PREGNANT

Did you know that something as simple as using the wrong lubrication when you have intercourse can spoil your chances of getting pregnant ? Most store-bought lubricants will damage the sperm and so they are strictly forbidden. The same goes for Vaseline or KY jelly. If you are using this type of lubrication, you could be reducing your chances of conceiving by half. Luckily, there are some substitutes ... one is egg whites which is extremely sperm friendly. Another option is a product called Pre-Seed, which is specifically designed not to be harmful to

sperm. Lastly, one of the best ways to improve your chance of getting pregnant is to increase your natural lubrication. This can be achieved by introducing more foreplay into your “baby-making activities” which will increase your arousal and therefore you will have more natural lubrication to help the sperm to stay alive. Also, if a man is more aroused, he will have a better ejaculation which results in more sperm.

THE PRAYER

Each and every one of us is going through tough times right now
But God is getting ready to bless you in a way that only He can
Keep the faith.

This prayer is powerful
And prayer is one of the best gifts we receive
There is no cost but a lot of rewards
Let's continue to pray for one another

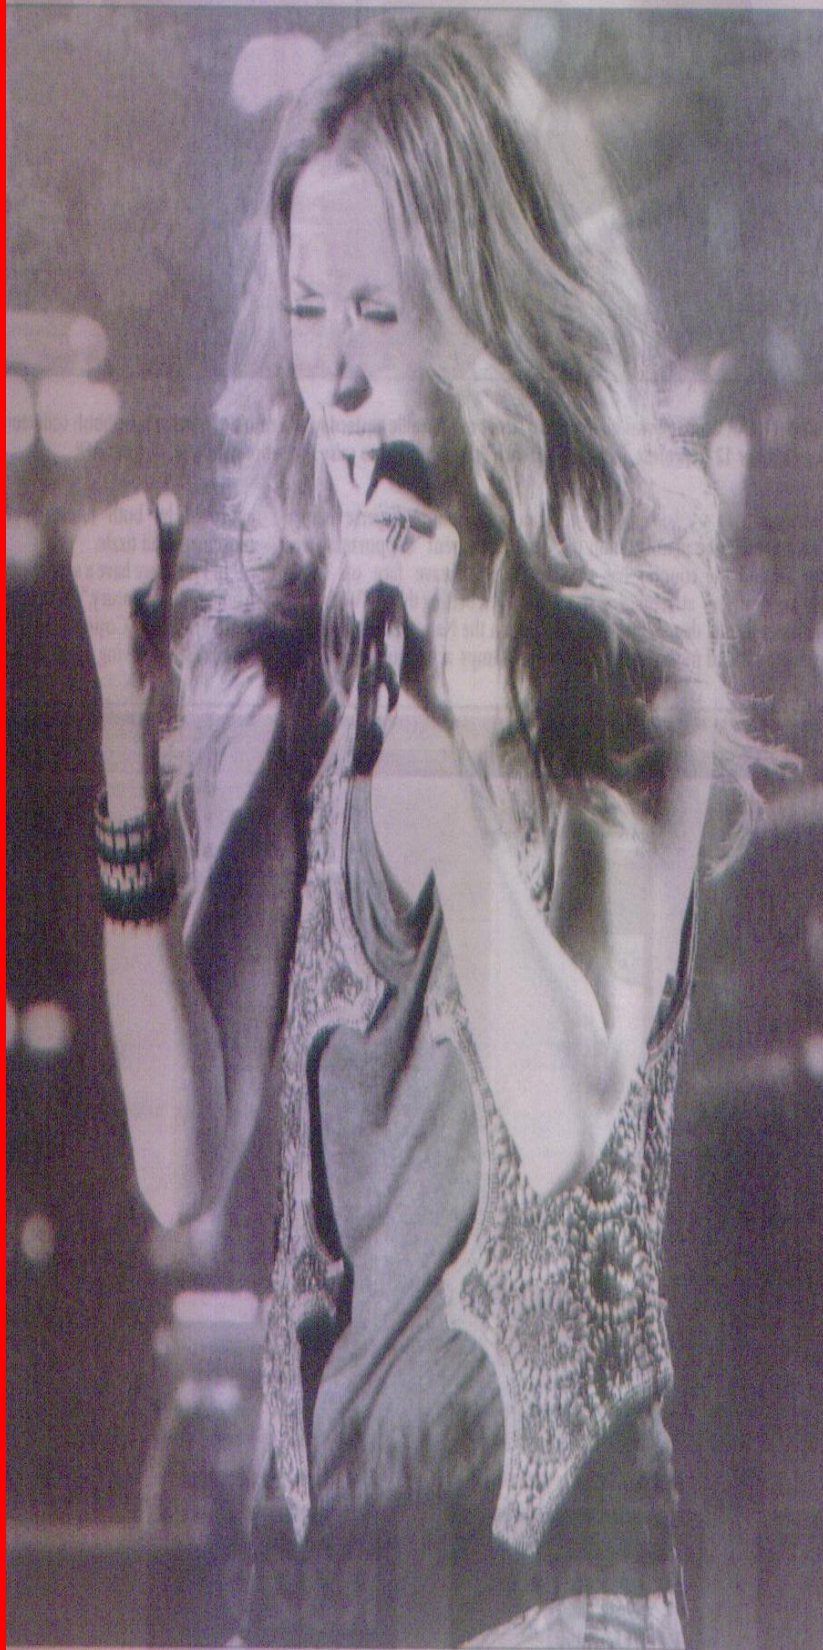

Father, I ask you to bless
My friends, relatives and those for whom I care deeply
Who are reading this right now ...
Show them a new revelation of your love and power
Holy Spirit, I ask you to minister
To their spirit at this very moment ...

Where there is pain
Give them your peace and mercy
Where there is self-doubt, release a renewed confidence through your grace.

Where there is a need, I ask you to fulfill their needs
Bless their homes, families, finances, their goings and their comings
In God's precious name.

AMEN

Celine gives birth to twins

She delivered two babies via C-section

CELINE Dion has given birth to twin boys.

The *My Heart Will Go On* singer is believed to have delivered the two babies via Caesarean section on Saturday at St Mary's Medical Centre, in West Palm Beach, Florida, at 11.11am and 11.12am.

The fraternal twins - which means they are non-identical siblings - weighed in at 5lbs 4oz and 5lbs 10oz.

Although they are both healthy, the babies will spend the next few days in incubators because they were born premature.

The due date had been in November.

A representative for the 42-year-old pop star - who also has a nine-year-old son Rene-Charles with her husband Rene Angelil - said: "Celine, Rene and their son Rene-Charles are thrilled ... Celine is resting now and they plan to discuss what to name the boys when she wakes up.

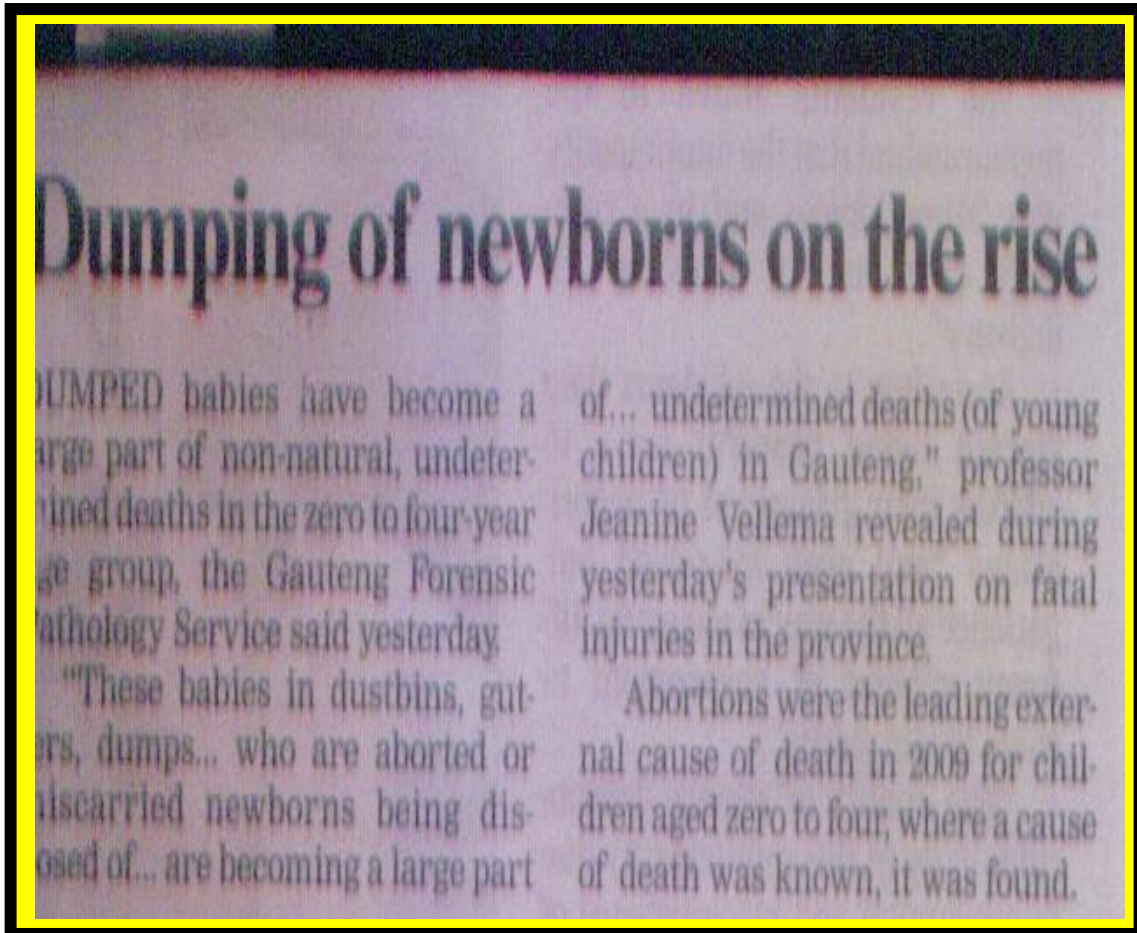

"Rene-Charles has been to the hospital to visit his brothers and is just so excited they are here."

The twins were conceived via in-vitro fertilisation (IVF) just as Celine and 68-year-old Rene's first child Rene-Charles was.

The Canadian singer previously revealed she underwent six gruelling courses of IVF to get pregnant again and admitted the process was "mentally exhausting".

She said: "I feel like I've been pregnant for over a year. I never gave up. But I can tell you that it was physically and mentally exhausting."
